

Action Research

PLAN

1. What is our research question for this project?
2. What do we want to happen?
3. Who will be involved?
4. What data will we collect?
5. What is our timeline for action?
6. Clarify roles – who will do what?
7. How will we record and share our results?

REFLECT

1. Think about what happened and share with others.
2. What worked well?
3. What changes do we need to make?
4. Plan for the next action research cycle.

ACT

1. Implement the plan (do what we said we were going to do).
2. Communicate with others involved in the action research project.
3. Keep track of what happens by collecting and recording data.

OBSERVE

1. Look at what is happening.
2. Examine the data on what is happening.
3. Get different viewpoints on what is happening (students, teachers, parents).
4. Report on what is happening.
